

Why Online Project Collaboration System?

- Access data from all over the world 24/7
- Allows your partners to read/download the documents from your server
- Automatic versioning of documents – with complete history of all versions and comments - Makes life easier for every one on the project because they know which is the latest version of the document
- Can view the documents online including DWG/DGN and other 200+ formats and comment on the documents using web browser (without needing any original software to view the documents)
- Collaborate with all the team members in your company/ Projects
- Track all submittals for various projects
- All projects information and progress is at one place
- System alerts the concerned people if any activity is over due
- Access is controlled for various people for various projects and folders
- You spend zero for hardware and systems maintenance
- Your data is backed up over few servers – No panic for data loss and virus problems
- Reduce your cost of Printing, Faxing and Courier
- Finally it streamlines the complete operations and business processes of your company

Call us right now to find out how does it work?
